# This week's VoteTopic:

Two weeks ago, we celebrated Black History Month by discussing whether you feel that your history and identity are represented in the school curriculum. Here's what you said (we will be doing another review of your results at the end of the month too!):

## Does the curriculum represent you?

"In History, we learn **98% about white people's history** and it's unfair because there is so **much more history in different ethnic groups** ... In short, other ethnic groups **don't get as much appreciation.**"

"Schools try their hardest to encompass a **diverse range of culture and beliefs** as best as they can."

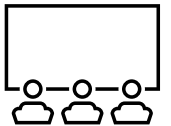

## Will cinemas disappear in your lifetime?

### Discussion points:

- When you last went to the cinema and what you saw.
- What different sorts of cinemas you've been to (i.e. outdoor, iMax, 3D, singalong, immersive cinema).
- Which streaming services you have, and whether you prefer them to going to the cinema.
- How long you think cinemas will survive for.

### Student research points:

- When the first cinema was created and what it was like.
- How cinemas have changed over the last few decades.
- How Coronavirus has affected cinemas.
- The impact of Coronavirus on streaming services.

### Please note:

This is our last VoteTopic before half term. We hope you enjoy your break!
